

Capacity up to 2'000 kg/h

The UDM-303 is a state of the art, fully automatic multiple piston depositor. It is designed particularly for a large production range.

By the consistent application of a modular concept, the machine is extremely user friendly, versatile, simple to clean and allows easy and quick product change.

Possibility to produce TRIPLE – and QUADRO-SHOT articles with the same machine by installing a modification kit accordingly.

Mechanical system

- Large depositing range with up to 80 mm piston stroke
- Compact dimensions: 1'640 x 1'900 x 1'700 mm (W x D x H)
- Meets the most rigorous hygiene requirements
- Completely stainless construction
- Maintenance-free operation
- Easy integration in existing lines

Double-Layer Power One-Shot

Long One-Shot filled bars

Long One-Shot tablets

One-Shot with ingredients

Standard One-Shot pralines, truffle balls, eggs, liqueur pralines

Triple-Shot

Quadro-Shot

Control system

Standard supply:

- Leading One-Shot software-technology
- Industrial PC Hardware
- HMI: graphically oriented Touch screen
- Event-Log with 10'000 entries
- Remote Control through LAN/WLAN network
- Operation language selectable
- Password protected operation
- Network-enabled
- Interface for coordination with external PLC
- Accurate temperature control
- Adjustable automatic temperature control
- Automatic hopper feed control
- Unlimited No. of recipes
- Programmable Stirrer
